Save Time and Money with EvTech Computer Management and Storage Services

In the world of Document Management (DMS), E-Library systems and Accounting software, Evolution Technologies continues to develop as one the more up-date and preferred professional service providers.

That's because we constantly demonstrate that we have the knowledge, skill, capacity and competence to readily respond to your needs.

So what makes us outstanding? It's our commitment to grow as an efficient cyber center and deliver accuracy, quality and first class service for every client.

We don't know of a business that is not aware of the importance of developing and maintaining a customer database. But we know that it requires money and specialist skill for a company to set up and manage DMS and E-Library systems.

Here is why we are strong:

We provide the technical talent and build systems that save time and money.

We design solutions for every type of company. And we develop Content Management Systems that enable continuous workflow and smooth tracking and storage of electronic information and images of paper documents.

Our step by step process also includes:

- Storage
- Versioning
- Metadata
- Security Management
- Indexing & Retrieval
- Scanning & Archiving

We acknowledge that every company's requirements are unique. But we also realize a common need in all...Every type of company in business today, needs a managed and regularly maintained database service.
